- Cutout 83mm

GU / GZ10 PREMIER DISPLAY LIGHTING FITTINGS

Mains Voltage Halogen products provide the benefits of halogen lighting such as crisp clear light and excellent colour rendering properties but without the need for a transformer.

This makes installation easier and provides excellent dimmability with standard domestic dimmer switches.

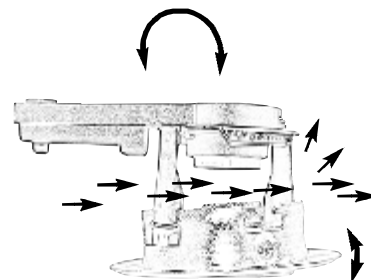

Halogen lighting is ideal for both general use and display purposes. The fittings are suitable for use with both GZ10 and GU10 lamps.

The Landlite range incorporates unique features to aid installation and improve performance:- "Airflow system" - Phase Lighting's design allows movement of air and dissipation of heat around the fitting thus prolonging lamp life.

"Twist - lock installation" - the unique design allows the installation to be pre-wired and tested before the luminaires are attached, then it is a matter of twisting the luminaires onto the wiring assembly and securing into the ceiling and the installation is complete.

All fittings are supplied complete with cable terminations facility, ceiling support clips, lamp retaining clips and a lamp replacement tool. Units are supplied without lamps (see lamp section for lamp prices).

TWIST LOCK MECHANISM FOR FASTER FIRST FIT INSTALLATION

AIRFLOW SYSTEM EXTENDS LAMP LIFE AND MAINTAINS STRUCTURAL INTEGRITY
